WHO WE ARE

Founded in the United Kingdom, we are a team of UK Special Forces & HM Royal Marines Veterans combining years of experience across combat operations, risk management, strategic business development, and manufacturing excellence, to redefine soldier-systems equipment.

Our mission is to pioneer next-generation tactical load-bearing systems that support our military, police, and security professionals in maintaining their tactical edge.

PROBLEM STATEMENT

// The evolving role of the Police Officer is outpacing innovation in tactical equipment

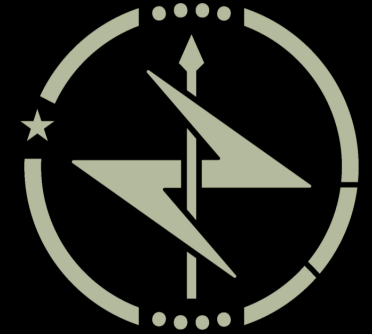

// A paradigm shift is occurring in Counter Terrorism and first response policing due to technological advancements and the increased capability of terrorist organisations.

// This has driven a **step-change** in the role of all police officers; especially our authorised firearms officers. More is being asked of our Police, and their role is becoming increasingly varied, creating **growing demand** for tactical systems with increased **versatility** and **interoperability**.

// The market is currently served by a modest number of tactical equipment providers and legacy systems, which have **found it challenging to keep pace** with changes in modern policing. As such, emerging demands are indicative of the urgent need to innovate and transform the tools our first responders have at their disposal.

SOLUTION

// Zulu Origin have designed, tested and produced a transformative load-bearing system to meet the nascent demands of our first responders

// We are a team of UK Veterans developing the future of tactical load-bearing systems for the first responders who continuously seek to enhance their professional and operational capability.

*// Through the operational experiences of our team and our unrivalled R&D process, incorporating feedback from rigorous end-user testing with some of the worlds premier military units, Zulu Origin has developed **LODEOut**; a transformative magnetic load bearing system.*

// Our ethos mirrors the unrelenting pursuit of excellence demanded by the professionals we design and build for, and our vision is to become a leading global innovator of tactical equipment for first responders, specialist firearms officers, and all NATO allied militaries.

LODEOut

A transformative, interoperable, and compatible load-bearing system for military, police, and security forces.

The **LODEOut** system utilises high-performance rare earth magnets in conjunction with a variety of innovative load-bearing mechanisms. Depicting and conceptualising our LODEOut brand is the image of a Lodestone, which was the first naturally magnetised mineral extracted by our ancestors for industrial use. Combining the terminology of **Lodestone** with the transformative effect this load-bearing system has for tactical loadouts, the LODEOut brand was borne....

LODEout

With unrivalled flexibility, speed, and durability across a range of tactical environments, **LODEOut** utilises high-performance rare earth magnets, high foam, rabbit teeth retainers (RTR), and mushroom hook connectors to create bearing system that is truly interoperable, versatile, and robust.

The system comprises of two key components;

1. **RECEIVERS**
2. **MODULES**

RECEIVERS are designed to be used in conjunction with existing legacy systems (e.g., MOLLE/PALS), and customers can select from a range of receivers and panels to compliment their plate carrier of choice (e.g., C2R Fast, Spiritus Systems etc.).

MODULES are the connective accessories that attach to the receivers. Be it Strip Charge Platforms, Flashbang Cells, Rapid Deployment Stretchers (RD Stretcher), Individual First Aid Kits (IFAK), Utility Pouches, or **LODEOut** Ops-packs, our modules can be rapidly attached to their respective receivers, allowing Officers to make swift transitions of mission essential kit in response to situational demands, alternating roles and/or individual preference.

STRATEGIC SUMMARY

Zulu is a pioneering start-up, **committed to developing innovative next generation load-bearing systems that complements existing carriage platforms**, to help our military, police, and security professionals maintain their tactical edge.

We have the **capability and plans to scale and bring our products to market**, with a burning ambition to become an industry leader of soldier-systems innovation and transformation.
